This preparation is free of DNase and RNase contamination as determined by incubation of the 4 dNTPs with radioactive substrates.</li> <li>3. The purity of this preparation is determined by HPLC. The minimum passing specification for the triphosphate content is 99.8%.</li> <li>4. This lot of dNTPs has been performance tested with Sequenase, <i>Taq</i> DNA polymerase, <i>Pfu</i> DNA polymerase and <i>T7</i> DNA polymerase.</li> </ol>
